

Erbil Nas

Software Engineer

I am a Senior Software Engineer with a Computer Engineering degree and over 9 years of experience. Having scaled products and led engineering initiatives in a high-volume ecosystem, I am now looking to transition into the international tech space to contribute to a global team tackling complex software challenges.

Work Experience

Senior Software Engineer at Trendyol Go by Uber Eats

Jul 2025 - continues

- Architect scalable frontend ecosystems and BFF (Backend-for-Frontend) layers utilizing Micro Frontends, Vue.js, React, TypeScript, and Golang to streamline data orchestration.
- Core maintainer and contributor to the Baklava Design System, ensuring strict cross-app component reuse and UI consistency.
- Lead platform optimization, security hardening, and full-stack system architecture initiatives, driving efficiency from client-side rendering to API aggregation layers.
- Actively support backend development and cross-team alignment, collaborating on API design, contract definitions, and microservices integration to unblock feature delivery.
- Mentor engineers on modern best practices, clean code, modular architecture, and efficient client-server data flow.

Senior Software Engineer at Trendyol

Jul 2021 - July 2025

- Architect scalable frontend solutions utilizing Micro Frontends, Vue.js, React, and TypeScript for high-traffic commerce platforms.
- Lead the development and governance of the Baklava Design System, ensuring component reusability and UI consistency across multiple business domains.
- Own system architecture and platform optimization, continuously driving enhancements in performance, security, and maintainability.
- Foster technical excellence across engineering teams through hands-on mentorship, code quality advocacy, and architectural guidance.

Software Engineer at Mindbehind

Oct 2019 - Jul 2021

- Led the full frontend modernization of the flagship web application.
- Developed and deployed cross-platform mobile apps for iOS and Android.
- Designed responsive UI/UX interfaces that measurably enhanced user interaction.

Web Application Developer at Yuxek Technologies

Jun 2019 - Aug 2019

- Engineered single-page applications (SPAs) using Vue.js, focusing on state management, component reusability, and fluid user experiences.
- Implemented responsive UI designs that ensured seamless cross-browser compatibility and high visual fidelity.
- Rapidly adapted to production codebases, delivering features under tight deadlines for a variety of client verticals.

Freelance Frontend Developer & UI/UX Designer

Dec 2017 - Oct 2018

- Developed responsive, high-performance web applications for a diverse range of clients.
- Designed intuitive UI/UX interfaces focused on maximizing user engagement and interaction.
- Translated client business goals into user-centered digital solutions from scratch.

Projects & Volunteer Works

Baklava Design System

Active

Baklava is a design system provided by Trendyol to create a consistent UI/UX for app users. Web implementation of the design system is created as native web components so it can be used within every type of web frameworks including Vue, React or Angular.

Volunteer at The Educational Volunteers Foundation of Turkey

Active

Since the day of its foundation, TEGV has focused on delivering non-formal education to children of primary school age, on the basis of the motto of "As each child changes, Turkey flourishes".

Education

Sakarya University

Computer Science & Engineering
2015-2019

Anadolu University

Management Information System
2019

Mugla Sitki Kocman University

Digital Game Design
2021

Skills

Architecture:

Microservices, Micro-frontends, Design Systems, Domain-Driven Design (DDD)

Frontend & Mobile:

Vue, React, Nuxt, Next, React Native, Swift, Lit, TypeScript, Zustand, Pinia, TanStack, Server-side Rendering

Styling:

Tailwind, Styled Components, SCSS, BEM

Backend & DB:

Golang, Hono, Node.js, Express, Bun, PostgreSQL, MongoDB, SQLite, Drizzle ORM, Redis, Couchbase, WebSockets

Cloud & Backend-as-a-Service:

Supabase, Firebase, Vercel, Cloudflare Workers/Pages

DevOps & Infrastructure:

Docker, Kubernetes, Nginx, Coolify, GitHub Actions, CI/CD Automation, Edge Computing

Testing:

Vitest, Testing Library, Cypress, Playwright, End-to-End (E2E) Testing

Tools & AI:

Git, Jujutsu, Figma, Penpot, Canva, Cursor, Claude Code

Languages

English

B2: Upper-Intermediate

Turkish

Native
